

# Website Announcement

The Pennsylvania Department of Health along with other community partners recognized a gap in health services for youth as they transition to adult life.

When youth leave school, they transition from having different or no insurance coverage, from seeing pediatric specialists to searching for adult medical specialists, and having good coverage for medications to having to understand new systems for obtaining medicines.

Working with the Pennsylvania Community on Transition State Leadership Team, agencies, and families, the *Transition Health Care Checklist: Transition to Adult Living in Pennsylvania* was created to guide youth, families and professionals during this time of transition.

This publication is available on-line. For a copy of this document please visit the Department of Health website at:
